

APE CLASSIC VAN SALES MANUAL

**PIAGGIO
GROUP**

SUBJECT

Widening of the Ape Classic Range with the introduction of the **Van version** to flank the current Cargo version.

WHAT

To offer a **practical, functional and economic** vehicle able to minimise *costs and satisfy transport and delivery needs in an **urban setting** thanks to its **significant and fully usable space** and a **load capacity** that is at the top of the short-range category.

HOW

A truck box with a **vintage flavour** that, recalling the shapes of early Ape Classic models, stands out from other vans in circulation thanks to its **inimitable and elegant** style.

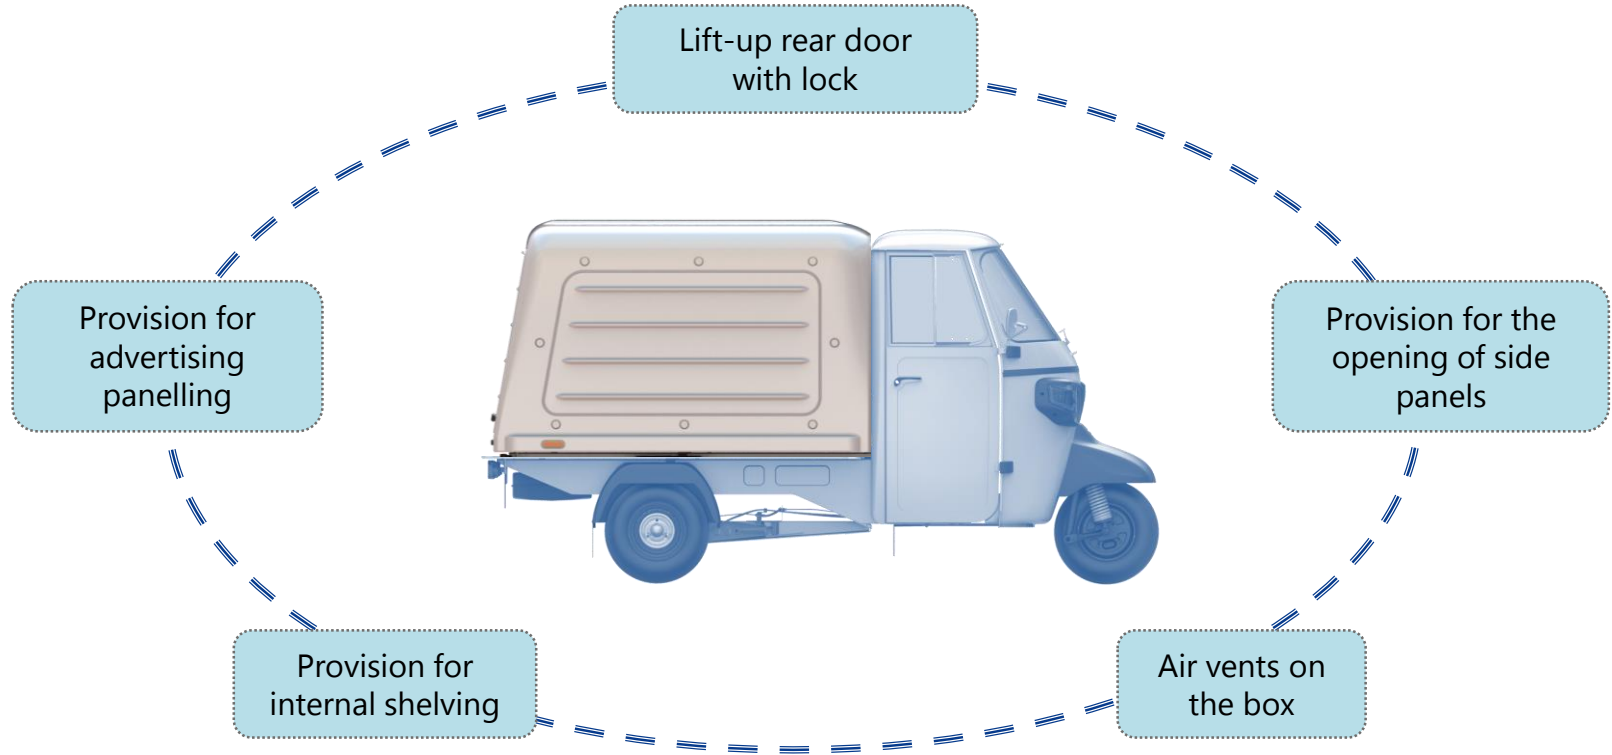

WHY

An offer that effectively meets with **demand**, which has remained constant but unanswered for the **Ape TM Van** model (out of production since late 2017), and positions itself as a valid replacement for the transportation and delivery of loads of a certain size in an urban setting and in total safety.

*(purchase, management and operation costs)

TECHNICAL OUTFITTING CHARACTERISTICS

TECHNICAL OUTFITTING CHARACTERISTICS: DETAILS

- **PROVISION FOR LATERAL ADVERTISING PANELLING**

The ABS and support struts are reinforced to allow for the drilling and application of **advertising posters** by the outfitters.

- **PROVISION FOR THE OPENING OF SIDE PANELS**

The panel is created with an actual «**cutting guide**» to facilitate this outfitting.

- **PROVISION FOR THE APPLICATION OF LATERAL STICKERS**

The sides are created in a **wrappable material** that allows the end client to **personalise** the vehicle in a unique and original way. In addition to this, the metallic structure allows for the application of external advertising panels.

- **PROVISION FOR INTERNAL SHELVING**

Inside the box, along the metallic structure, threaded inserts allow for the **installation of shelves** to help with the division of work materials.

TECHNICAL OUTFITTING CHARACTERISTICS: DETAILS

- **LIFT-UP REAR DOOR WITH LOCK**
Lifting rear door complete with handle for easy loading and total reliability.

- **AIR VENTS ON THE BOX**
Air grilles located at the front of the box **ensure adequate ventilation** and prevent any humidity and condensation inside the loading space.
