Ape[®]
Calessino

Ape Calessino, born to stand out

Ape Calessino is a special vehicle, unique in its kind, thanks to the particular details that make it an icon recognisable all over the world. The **inimitable design**, perfectly in line with the modern **neo-vintage trend**, is just one of the reasons that Ape Calessino continues to astonish more than 70 years after its birth, providing thrills, not only in terms of driving, but even for those who see it. The sleek lines of the rear body, combined with the *nude-look* wheels that enhance the vintage-style shapes, are all elements that contribute to making Ape Calessino suitable for any occasion.

The **compact dimensions**, the **exceptional handling** and the exclusive individual, spacious and comfortable seats are characteristics that make it particularly popular as a **people carrier** in tourist settings by resorts, exclusive hotels and quality sightseeing operators, as well as for moving around in theme parks, sports and nautical centres and, more generally, for anyone who wants to promote their business in a way that stands out. Because of its elegant and romantic style, Ape Calessino is ideal for **leaving a lasting memory** for **special events** or for discretely turning heads as it glides smoothly through the city streets, because it is not only a means of transportation, but a **way of expressing yourself** capable of transforming every time it is used into a unique experience with a youthful, fresh and glamorous flavour.

In harmony with the environment

Ape Calessino is a vehicle primarily used in green areas and historic centre. This is why themes such as reduced fuel consumption and low emissions are particularly relevant. In fact, the **197 cc Euro 4 petrol engine** with three valves and electronic injection, in addition to being quiet, allows for a smooth and comfortable ride, in full **respect of the environment**.

Perfect for every occasion

Approved to seat **two passengers in addition to the driver**, Ape Calessino is unique with its convertible structure through the opening of the **practical top** in an elegant sand colour, which lets you enjoy the scenery and contact with the open air throughout the ride. Also, thanks to the four doors in waterproof canvas and the quick mounting of the **window kit**, **available as an option**, rain will not pose a problem. You will be able to continue travelling in complete comfort, without sacrificing the pleasure of originality. Ape Calessino available in white or red, timeless classics, or in the new and attractive light blue livery.
